- It is not recommended that those under the age of 16 use the chair.
- People weigh over 300 pounds using the chair will void the warranty.
- Do not use the chair if the back pad is flipped over exposing the rollers.
- Please use well-grounding power supply suited to this product.
- Please unplug after using or before cleaning to avoid injury or damage.
- Please operate this product according to this manual instruction.
- Do not use accessories which are not recommended.
- Do not use this product outdoors.
- Please read this manual instruction carefully before operation.
- 20 minutes of usage each time is recommended.
- Please do not fall asleep while using this product.
- Please do not use it if drunk or feel unwell.
- Please do not use it within one hour after having meal.
- Please do not make the massage function too strong for avoiding injury.

## Environmental Usage

- Please do not use the chair under high temperatures or in moist environments
- Please do not use the chair in transition between hot and cold environments. Let it return to room temperature for at least an hour first.
- Please do not use the chair in a dusty environment.
- Please do not use the chair where there is not enough space for use or where there is poor ventilation.

## People who are not suitable to use this product

- Persons with any other medical conditions in addition to those specified below need to consult their physician prior to use:
  - Osteoporosis
  - Heart Disease
  - Electronic medical equipment such as a heart pacemaker
  - Fever
  - Pregnancy or women in menses
  - Skin injuries or skin disease
  - Mental disease
  - Heat sensitivity
  - Irregular curvature of the spine or other spine abnormalities
  - Malignant tumors
- Additional Safety Information:
  - Do not use the chair if you are wet
  - The appliance has a heated surface. Persons insensitive to heat must be careful when using the appliance.

## Safety

- Check the voltage if it is suitable to the specification of this product.
- Do not use wet hand to pull the plug.
- Do not make water go inside this product to avoid electric shock or cause damage to this product.
- Do not damage the wires or change the circuit of this product.
- Do not use wet cloth to clean the electric parts such as switch and plug.
- Be away from this product under power cut state to avoid injury if the power comeback suddenly.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

## Maintenance

- Damage caused by the user attempting to disassemble the chair or replacing spare parts themselves will void the warranty.
- This product should be maintained by certain appointed agents, DO NOT attempt to disassemble or repair the chair yourselves.
- Please do not forget to cut the power after usage.
- Do not use this product if the socket looses.
- If this product will be left unused for long, please curl up the wires and reserve this product in dry and dustless environment.
- Do not reserve this product under high temperature or near fire and avoid longtime direct sunshine.
- If the detachable cord / supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a Hazard.
- Please clean this product by dry cloth. Do not use thinner, benzene or alcohol.
- The mechanical components of this product are specially designed and made, it is not necessary to be specially maintained.
- Do not use edged res to thrust this product.
- Do not roll or pull this product above uneven ground, it should be lifted before moving.
- Please use it intermittently, do not make this product work continuously for long.

## Solution of ordinary malfunctions

- Solution of ordinary malfunctions: Solution of ordinary malfunctions
- If it is nature movement voice if the motor sounds while in usage.
- If the controller cannot work normally, please check the plug and socket if they are connected strongly and make sure the switch is turned on.
- If the rated working time is over, the product will automatically activate the power-off button; if this product works continuously for long, the temperature protector will make the product automatically power-off, wait at least half an hour to restart the chair.

## Name and function of components

## Functions

- This product is designed with a set of muted and smart 3D mechanical hands, which can move up and down, stretching back and forth.
- The shoulder part is designed with automatic detection and micro adjustment function; body curve and massage points automatic detection, it can automatically adjust the distance of massage hands' moving back and forth according to the detected body curve and massage points, to make the massage more humanistic and scientific.
- Designed with comfort, ease, ache relieve, fast experience, negative oxygen ion, relax, waist stretch and full air pressure, and other specific massage functions.
- Set with two kinds memory storage massage functions M1 and M2.
- Manually select the upper body massage; three massage position options of overall, partial and fixed position; six massage methods of shoulder grasping, kneading, tapping, shiatsu, kneading & tapping and 3 D; five massage speed levels available; under tapping and shiatsu massage status, the width of the massage hand can be adjusted in five levels.
- Arm air massage function (built-in 8 airbags), upper arm air massage function (built-in 4 airbags), with 3 intensity adjustments.
- Lower body air pressure massage function: back air pressure massage function (built in 4 airbags), buttock air pressure massage (built in 16 airbags) legs air pressure massage function (built-in 36 airbags), with 3 intensity adjustments.
- Back heating function, use carbon fiber as infrared heating source.
- The footrest extended stepless to suit for different body heights.
- On upper arm has two grades width adjustment function (When you adjust to the last grade, to push into the arm about a gear distance then lose your hand and arm device will automatically reset, and so on) in order to adapt to the different shoulder breadth of users.
- With slide rail on back rest, make a zero place between backrest and wall, maximally save place.
- Footrest lifting, backrest lift and laying and lie-down models adjustment.
- With negative oxygen ionizer on upper arm.
- Intelligent terminal (cell phone or tablet PC) control the massage chair by blue tooth.
- MP3 player function, connect with intelligent terminal by blue tooth to play music, or connect with the audio cable directly on massage chair's audio connecting base to play music.
- Auto massage program download.
- 8 natural magnets equipped on massage balls and calf rest airbags.

## Standard functions

### 1. Negative oxygen ion function (button on left upper arm).

- Innovative negative oxygen ionizer design on head part, it can emit negative oxygen ion ceaseless.
- By the national infrared and industrial electric products quality supervision and inspection center verification, its negative oxygen ion concentrations up to 240 thousand /cm<sup>3</sup>, equal to forest or waterfall, helpful for spontaneous recovery on human body.
- Negative oxygen ion can reduce PM 2.5, optimize room air, play an important part in improving human body immunity.

### 2. Magnet therapy function

- Place 8 natural energy magnet in calf airbags.
- By the national infrared and industrial electric products quality supervision and inspection center verification, the surface of the magnetic intensity is 73mT, according with the best protection strength of national standard (40-110mT) .
- Magnet therapy can lower cholesterol, eliminate free radicals accumulation in the body, enhance human immunity, and other functions.

### 2. Music player

- On your left armrest with audio jack equipment, connect with cell phone or other digital audio equipment, you can enjoy music and massage when relaxing.

Negative oxygen  
ion function

Magnet therapy function

Audio jack

With safety switch in the power source box, if any heavy weights on the box cover, the backrest lay down function will be stopped, avoiding accident crush injuries when the backrest down.

figure 8

Figure: hex head screw fixed in front part of armrest

figure 9

figure: hex head screw fixed in back part of armrest

### The disassemble and using of pillow pad and back cushion

- Using head cushion can reduce knead massage strength for neck and shoulder, it all depends on you whether to use it (we suggest you using it). Head cushion and backrest are connection through a zipper (figure 1), upturn the back side of the head cushion, and put the AB flannelette inside of the head cushion insert the belt above the backrest (figure 2). Turn down the head cushion, put the back side lay on the backrest. It can adjust to a suitable position based on different size (figure 3).

### Floor Protection

- Put the heavy massage chairs on the wood floor for a longtime may damage the floor, so please place a carpet or other object to avoid this damage.

Do not move the chair with its wheels on wood floor, rough ground or in a narrow space. Two people are required to lift the chair in this case, carry the calf front sealing plate and back cover ( please don't lift the armrest ) .

## Moving the chair

- Make sure all the wires are away from the floor, if you need to move, focus on the groove of the back cover, lift up to an angle (when the centre of gravity fall on the front caster), you can move the chair forward, then restore the chair to the normal angle .

### NOTED

Please must turn off the power switch, then unplug the power cord and remote control wire before moving the chair .

## Product specification

Model: A85

Description: Massage Chair

Configure: 01

Rated voltage: 110-120V ~ 60Hz ☐  
220-240V ~ 50Hz/60Hz ☐

Rated power input: 200W

Rated time: 20 Min

Noise: ≤58db

Standby power: <0.5W

Safety Design: Class I

Material introduction: PVC, PA, steel parts and electric &ele-tron parts

MATERIAL	PU	LEATHER	CLOTH	WOOD
